Valuing education!

EDUCATION IS THE UNIQUE WAY TO RAISE GENERATIONS WHO READ, SEARCH, MAKE PLANS AND FIX GOALS ABOUT THE FUTURE.

Education is the unique way to raise generations who read, search, make plans and fix goals about the future. Knowledge refers to the search for meaning that lasts until the last breath of a person. In this sense, the main purpose of education is to raise individuals who always renew and improve themselves and who are able to deepen their point of view about human being, society, life and the World.

As a matter of fact, the July 15 coup attempt, that martyred 250 of our citizens and injured 2193 more, revealed once again the importance of a national and local education system, imprinted with universal values, that is open to questioning and research and generates a critical mind.

For centuries, Turkey has been the cradle of various cultures, religions and civilizations and the first stop for the explorers of science, knowledge and wisdom thanks to its bold libraries and educational institutions. The values and experiences that emerged in this geography have enlightened the path of humanity throughout History.

Established on June 17, 2016 Turkish Maarif Foundation plays an important role both for sharing with our friends the deep experience of our country in the field of education and for fulfilling its mission that have lasted for centuries. I do believe that our foundation will fulfill the task it has undertaken properly and wish all successes in its activities.

TURKISH MAARIF FOUNDATION

A WAY OF RAISING GOOD PEOPLE

ON THE WAY TO 2023

While the centenary of our Republic is approaching rapidly, our country has reached an important place among the nations of the world in the race of civilization. Our experience, knowledge and belief, that have brought different cultures together in this land for a thousand years, call us back to our historical destiny.

In order to renew our potential, the most permanent and long-term manifestation of our country's long-standing resurrection steps undertaken in various field will be certainly in the field of education. In such a period, what we need is to be an institution that feeds on the richness of its history and walks into the future by blending its own tradition with wisdom, joining the universal and adding new elements to it. The significance and value attributed to education by the civilization of which we are the successors have the faculty to encompass science, action and wisdom while the world seems condemned to unilateralism.

Turkish Maarif Foundation is a move of Turkish cultural diplomacy, which has always acted according to the collective conscience of Humanity, in the field of education. Rooted in the past and aiming to construct a better future, our Foundation aspires to raise good people who use their knowledge and wisdom for the peace and tranquility of humanity.

Moving with the ideal "while one of its feet is anchored on these lands, the other one is encompassing the entire world", Turkish Maarif Foundation will be a standard-bearer of the values we aspire.
